

ELECTHRON AIRDROP

Yes, we know, the free NFT that you are going to or just received is not a Bored APE or any other that is worth millions of dollars, but it is what we call UTILITY NFT, because it is a useful NFT, more than a pretty NFT, although you will surely end up loving this NFT.

The unique code that this NFT has will allow you to store ELECTHRONS, our cryptocurrency, before it goes on the market, for free, which will be delivered to you for free in your wallet, without you having to take any additional action. The ELECTHRONS and additional prizes that you win, participating in our airdrop, will be delivered to you when our blockchain is implemented

To win ELECTHRONS you have to perform some tasks, participate in the lottery, hold and other fun activities that we will share, we have designed a large number of activities to make collecting ELECTHRONS fun and exciting. Think of it as a treasure hunt.

We will distribute 20,000,000 ELECTHRONS among all those who participate in this airdrop, which will take place prior to the launch of the cryptocurrency and

Electhrons.github.io

[Electhrons_Elth](https://twitter.com/Electhrons_Elth)

[Electhrons_Elth](https://discord.com/invite/Electhrons_Elth)

before the ELECTHRONS are sold to the public. When all of those cryptocurrencies have been distributed, we will launch our financial ecosystem. We recommend you read the Whitepaper to learn about our financial ecosystem.

We do things this way, because we believe that the greatest value a crypto ecosystem can have is the community that supports it. We know of many communities that are forgotten once a token or cryptocurrency is listed. We want to let you know that we are different from all of them. For us, it is the community that keeps our ecosystem alive, that is why we want to distribute not 1, nor 100, nor 1,000, but rather distribute 20,000,000 ELECTHRONS among our community and everyone can participate easily, without limitations, with the same opportunities to participate and win.

We have created a series of tasks, games and activities that you can do to earn ELECTHRONS, before they are released. It's up to you how many ELECTHRONS you manage to win for free before the launch of ELECTHRONS and our entire financial ecosystem. You don't have to buy anything, you can store ELECTHRONS for free, you just have to perform the simple tasks that we will be proposing and pay attention. That is all.

This is an open airdrop for everyone, without any kind of limitation, easy to understand, you can win ELECTHRONS without having previously bought anything, without investing, you just have to have fun.

IMPORTANT CONSIDERATIONS.

If the 20,000,000 ELECTHRONS are distributed in a week, in a month, in a year, it depends only on the community. If everyone jumps in and plays, the launch time for our financial ecosystem may be soon. We will move to the next stage when the 20,000,000 ELECTHRONS are distributed to the community.

All the information, about who wins what amount of ELECTHRONS, will be published in a GOOGLE SHEETS document that will be public for everyone, hiding only sensitive data such as usernames and wallet addresses. Only the unique code printed on the NFT you have obtained will be visible.

The NFT is free, that is, we will not charge you anything to have it, but to mint the NFT, you have to pay the gas fee that does not depend on us. We have preferred POLYGON/MATIC because you pay little for gas. We have chosen OPENSEA because it is the largest NFT market that exists so far and it is one that everyone knows and is easy to use.

The ELECTHRONS that you have stored will be sent to your wallet for free, without

you having to do anything at all, without strange deposits, or anything. But you will have to be patient because they will be deposited after the financial ecosystem has been launched, and after the private sale is over, in which you can also participate if you want, the link is on our website.

You must consider that we will launch a new blockchain, so you may have to add the data of our blockchain to your wallet in order to receive the ELECTHRONS that you have earned, but we will be reporting all this on our social networks, so we recommend that you be attentive, to receive any news.

We recommend you to be attentive to all our social networks, because there we will publish everything, games, contests, rewards, launch dates of each of the platforms, launch date of the entire ecosystem and among other things. It will be easier for you to participate if you stay active and up to date on our social networks.

All the free NFTs we give you have a unique code that starts with ELTH***. You can only have one such free NFT registered per wallet and associated with your social media accounts.**

The ELECTHRONS are stored in that code, in the GOOGLE SHEETS document, once we have finished the airdrop, we will send all the ELECTHRONS that you have earned to the wallet that has been associated with that unique code. But if you have several codes associated with the same wallet or have claimed several free NFTs, with different accounts and wallets, we recommend that when you have received all your prizes, only then do you collect them all in a single account and in a single wallet.

Only the user who has earned the ELECTHRONS that are stored in the unique codes, can transfer their earnings to other wallets, when they have received the ELECTHRONS they have earned. The user will be able to move the ELECTHRONS on their own account and at their own cost, we will limit ourselves to delivering them when our blockchain has been launched.

You can claim as many free NFTs as you want, if you have multiple social media accounts and multiple wallets. You can accumulate ELECTHRONS and participate with all of them, but we recommend you harvest everything you have earned, when our ecosystem has been launched. Because if you have more than one free NFT associated with the same wallet and the same social networks, only the first one you have registered will win ELECTHRONS and the other code will be canceled and you will have lost everything you won. So we recommend that you claim as many free NFTs as you want, but with different social media accounts and different wallets. So you can earn more by participating.

If you transfer or exchange the free NFT that we are giving you to another wallet or give that free NFT to another person, all the ELECTHRONS that you have stored there will be lost. You also cannot enroll more than one free NFT per wallet or social network. But if you can have other codes associated with the same account that do not start with ELTH*****, which are the NFTs that you can acquire at OPENSEA if you want to increase your chances of winning.

HOW TO GET MORE UNIQUE CODES.

You can have all the unique codes you want associated with the same wallet, as long as the start of your code is different from ELTH*****, because those that start with ELTH are free NFTs and can only be registered 1 per wallet and social media, though you can use as many wallets as you want and as many social media accounts as you want to earn more ELECTHRONS.

To associate more unique codes to the same wallet, you can buy other airdrop NFTs that we have created for OPENSEA, which have the same function as free NFTs and allow you to accumulate more ELECTHRONS. Of those NFTs you can have as many as you want and they will allow you to accumulate even more ELECTHRONS in your wallet.

To add them, simply use the Telegram Bot to associate the NFTs you have purchased to your account.

HOW TO TAKE PART.

It is simple:

- **Step 1.** You enter the link and mint your free NFT, which has a cost of \$0, but you have to pay the POLYGON/MATIC gas fee (that does not depend on us).
- **Step 2.** You register the unique code of the free NFT, in the Telegram Bot.
- **Step 3.** You participate in the activities and we take care of the rest.

HOW TO EARN ELECTHRONS.

You earn ELECTHRONS for participating in the community. Sharing images, videos and content on social networks. Carrying out the tasks and having fun with the activities. It's that simple.

We will give ELECTHRONS for sharing content on social media and for winning

Electhrons.github.io

[Electhrons_Elth](https://twitter.com/Electhrons_Elth)

[Electhrons_Elth](https://discord.com/invite/Electhrons_Elth)

contests or just being active. We will be posting content, assignments, and instructions on all of our social media. So we invite you to participate, each activity gives you a different amount of ELECTHRONS and has different characteristics, so they will be detailed in due course.

All NFTs with a unique code, that you have bought in OPENSEA and that start other than ELTH-, automatically store ELECTHRONS weekly. That easy you can win, that easy you participate.

Weekly lottery.

We will hold a weekly lottery, to give away between 10 and 10,000 ELECTHRONS to everyone who has an NFT with a unique code (including free NFTs and those you have purchased).

All NFTs with a unique code automatically participate in the lottery, including those that do not have an owner, you do not have to buy anything. There will be a weekly draw with a single winner, the prize will be stored in the lottery winner's account, in the public document of GOOGLE SHEETS. All accumulated ELECTHRONS will be automatically sent to all ELECTHRONS holders, when our blockchain is launched.

If the winning code is not associated with any wallet, the prize will be declared void and the prize ELECTHRONS will be used for other community prizes. For this reason, it is convenient to have several unique codes associated with the same wallet, because that way you could win many more ELECTHRONS.

HOW TO PREVENT SCAMS

We recommend you follow the official channels of our ecosystem, social networks are published on our website and everywhere. To avoid scams consider the following:

- We will never ask you for sensitive data, such as passwords, codes and others. We will only ask you for public data, such as your public wallet address, your Nick on social networks, similar data.
- If we need sensitive data from someone, we will always notify you publicly first, so that person can contact us. We will always use the official contact channels, provided by the user.
- If we speak to you for any reason, we will always do so through official channels. We will never send you messages requesting anything, everything is

always published on social networks and you will have to contact us.

- **Report those who want to scam you, using the name of our ecosystem or our cryptocurrency, so that we let the rest of our community know through our social networks. This is how we take care of each other.**
- **Always communicate with us through our social networks. Keep in mind that we get a lot of requests, so be patient, we'll get back to you, but it might take a while. Although we try to respond to everyone quickly.**
